

AMBIANCE SALON & SPA

MICROBLADING AFTERCARE INSTRUCTIONS

How to care for your Cosmetic Tattoo:

-Clean the area with a small amount of lukewarm water/sterile water (if you have it) on a cotton pad 2-4 times a day for the first day. This will help remove any excess lymph, blood and pigment that may appear after the procedure.

For Post-Treatment Care, use only these recommended liquids 3x a day:

- Sterile Water or Saline - for dry skin only
- Witch Hazel - for normal to oily skin only
- Bactine Spray - ONLY if itching occurs

-In case of dryness, but not earlier than the 3rd day, apply a very small amount of ointment supplied to you, coconut oil, or grape seed oil. Make sure your eyebrows are not greasy, but just moistened a little so you won't see any residue of the oil.

In the next 7-10 days, client is to pay attention to the following:

- Do not touch your eyebrows, except to clean.
- Keep your eyebrows dry and clean for the next **7-10 days**.
- Avoid all contact with water. A thick crust will appear if you do not, and pigment will fade.

-After 10 days you may use a gentle soap or non greasy facial cleanser to keep the eyebrows clean.

Be cautious of the following:

- If skin is oily or sweaty, be sure to clean the skin as necessary.
- Please DO NOT use any other creams except the ones recommended to you, in order to prevent possible infections or allergic reactions.
- Keep brows out of the sun throughout the healing process. Do not apply ANY cosmetics in this area and avoid sweating for AT LEAST 10-14 days. Keep the area clean and let it breathe!
